

Freiburger Institut für Forstwissenschaften

Seminarreihe Sommersemester 2018

Raum 200, 2. OG Herderbau,
Tennenbacher Str. 4, 79106 Freiburg

UNI
FREIBURG

02.07.2018, 14.00-18.00 Uhr:

Drought impacts on forests – potential adaptation strategies

- *Andreas Rigling (WSL Birmensdorf):* “Manipulating water regimes in forest stands”
- *Jürgen Bauhus (Uni Freiburg):* “The potential of thinning to mitigate drought stress in trees”
- *Ulrich Kohnle (FVA Freiburg):* “Growth of trees under (almost) open conditions: still affected by competition effects?”

Kaffee - Pause

- *Matthias Cuntz (INRA Nancy):* “An ecophysiological perspective on thinning”
- *Harald Bugmann (ETH Zurich):* “Long-term effects of thinning on forest dynamics”
- *Marc Hanewinkel (Uni Freiburg):* “Thinning – Trade-off between economy and risk reduction”
